Reference Comments:  
"Bezoin Gum" www.herbies-herbs.com; CD #5

Research Facts:  
Benzoin gum, (Strax benzoin) the resin is used as incense, a fixative in perfumes, and is added to cosmetics to prevent fats turning rancid. It is an antiseptic for cracked and chapped skin, and an expectorant for severe bronchitis. As part of friar's balsam, it soothes coughs and sore throats. Benzoin is used in aromatherapy, but may cause allergies. Dr Ralph and Mrs Olga Crawford donated their extensive Canadian dental collection to the DCF to create the museum in 1997; further donations were received while Dr Crawford was Curator Emeritus at the Dental Canada Museum until its closure in 2008.
